

## All Javelin and Javelin Odyssey Hybrid jump at Skydive Chicago's Summerfest 2010

Thanks so much for your interest in this low pressure, focused on a good time event. Sun Path Products would like to get together with some loyal customers for two days of something that, as far as we know, has never been done. Two days of organized hybrid jumps with everyone jumping our harness and container systems.

What we need from you:

1. Please be willing to commit to at least one full day 8-10 jumps on Monday July 26<sup>th</sup>. (We will continue on the 27<sup>th</sup> provided we have the people and the interest)
2. Be able to safely fly a belly or stand position in the formations we choose and willing to move around based on skill level and the needs of the group.
3. Own (or borrow) a Javelin or Javelin Odyssey harness container.
4. If you have a camera helmet by all means feel free to wear it however we will provide debrief video.

THAT'S IT!

What we will provide:

1. World class belly organizer Lyle Presse, freestyle world and national champion Rook Nelson and 8-way world champion Chris Talbert to keep the formations safe, strong and successful
2. Video debrief for all of the jumps, hey if we are going to get together and skydive, let's learn something while we are at it!
3. A chance for each dive to build on the success of the last resulting in the first ever all Javelin and Javelin Odyssey HYBRID-SEQUENTIALS!
4. And of course there is a strong chance of some ice cold refreshment after our last jump each day!

What to do next:

1. Send an e-mail to [hybridjumps@sunpath.com](mailto:hybridjumps@sunpath.com) with your name, flying preference (belly or freestyle/stand) and experience level.
2. You will receive a confirmation from Chris and that's that, we will see you at the Sun Path tent at 8:00 AM Monday the 26<sup>th</sup> of July at Summerfest!

Hope to see you all there; you can use the above e-mail address or [chris@sunpath.com](mailto:chris@sunpath.com) for questions or concerns.

Thanks!

The Sun Path Products Team!
