In our effort to continue offering the most comfortable harness container system in the world, we are proud to introduce the new **Sun Path Backpad**, or SPB. This backpad is the result of several years worth of development by Sun Path engineers. This channeled backpad offers "standoff" between the rig and the jumper's back, allowing air to circulate and keep the wearer cooler than a standard backpad. The backpad is available on the Javelin Odyssey, sizes TNJK.5 and smaller in Black, Royal Blue and Red. Contact your Sun Path dealer to order your Javelin Odyssey with the new Sun Path Backpad today!
