

# Javelin Aurora Main Packing Instruction

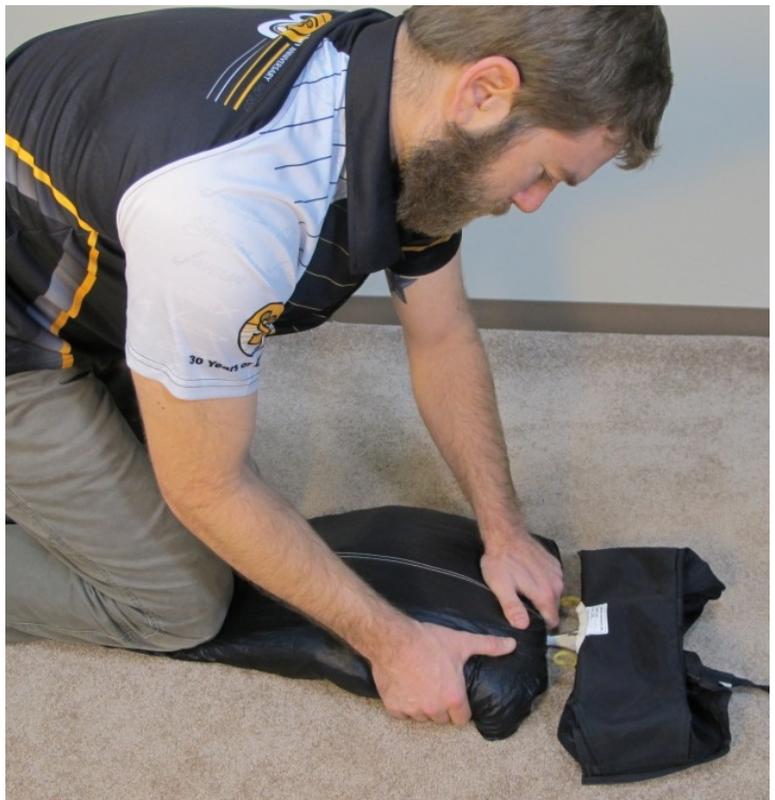

Rev 0, 03/27/2017

**NOTE:** The Javelin Aurora is specifically designed for wing suiting and is **NOT** intended to be used for BASE jumping, formation skydiving, free flying, or any other similar skydiving activity other than wing suiting.

**Step 1.** Pack main per manufacturer's instructions up to this point.

**Step 2.** Roll top under to thicken and square off.

**Step 3.** Insert the canopy deeply into bag.

**Step 4.** Make first stacking S-fold no greater than half the length of the bag.

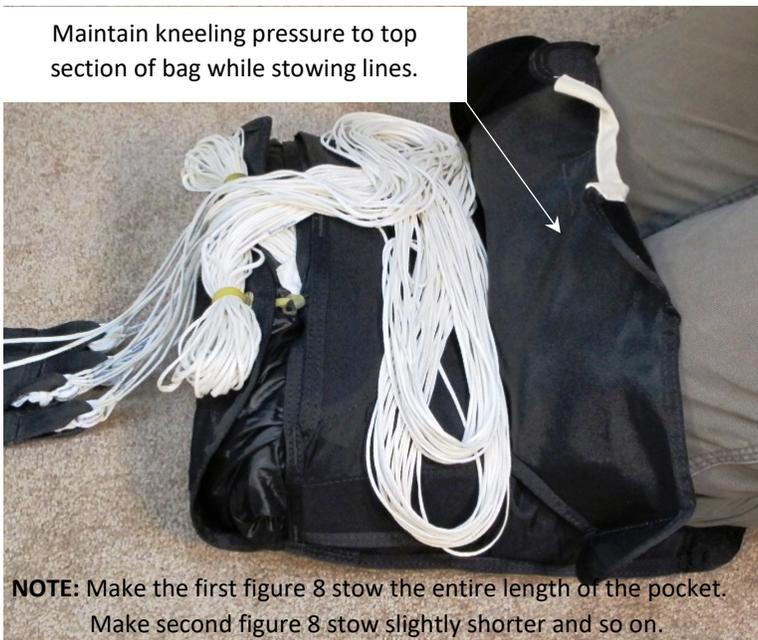

**Step 5.** Place in bag as shown. →

**Step 6.** Stand D-bag up, fold/roll remaining canopy fabric into bag as shown. ↓→

**Step 7.** Lay bag back down and close mouth-lock. Stow remaining lines in a figure 8 pattern.

**Step 8.** Close line cover as shown. →

**Step 9.** Flip main bag into container rotating 180 degrees. Line stows should be facing the reserve tray as shown. →

**Step 10.** Attach pull-up-cord to closing loop. Center the bag in the main pack tray and press it deeply into container.

**Note:** Main closing loop should be no longer than 1 1/2" (30mm). **38 mm**

**Step 11.** Close bottom and top flap as usual. Note position of Velcro on bridle. Bridle **must** come out from the bottom!

**Step 12.** Before pulling side-flap closed, thread pull-up cord, then **firmly** push the bottom corner tab under the bag.

**Step 13.** Repeat to opposite side and pin.

**Step 14.** Grip bridle and pin and close container as shown. →

**Step 15.** Pack pilot chute same as sport Javelin only **much wider** than usual.

**NOTE:** The BOC spandex pouch also becomes the bridle cover.

**Step 16.** Close pin-cover same as sport Javelin.
