

Sun Path Products Inc. 404 W Edinborough Ave. Raeford, NC 28376 (910) 875-9002

How to wash your Sun Path Products Inc. harness/container system

1. Disassemble and **remove all** components
2. Cover up all hook Velcro with pile Velcro
3. Place harness/container in mesh bag or pillow case, tie closed
4. Place in a front load washing machine with another mesh bag or pillow case with a couple of towels to offset the load
5. Wash with cold water using a non biological washing detergent. A non biological detergent contains no enzymes or bleach. Typically ¼ cup will work.
6. Remove from washing machine straight away.
7. Ensure all of the detergent has been rinsed away. This may require running the rinse and spin cycles again, or rinsing by hand and drying longer.
8. Hang dry for a minimum of three days in a well ventilated area, do not let you container dry in the sun!

You can always contact Sun Path with questions at 910.875.9002 or rigging@sunpath.com
